Setting up dialing rules

- Click **Start – Control Panel**
- Select **Phone & Modem Options**
- **On the General tab:** If you don't currently have any phone settings then select **New**; if you already have settings then select **Edit**

The 'Edit Location' dialog box is shown with the 'General' tab selected. The 'Location name' is 'My Location'. The 'Country/region' is set to 'United States' and the 'Area code' is '610'. Under 'Dialing rules', the following fields are filled: 'To access an outside line for local calls, dial:' is '9', 'To access an outside line for long-distance calls, dial:' is '9', 'Use this carrier code to make long-distance calls:' is empty, and 'Use this carrier code to make international calls:' is empty. The 'To disable call waiting, dial:' checkbox is unchecked. The 'Dial using:' radio buttons are set to 'Tone'.

- Ensure the Area code is correct
- Select "9" to dial both local & long distance calls
- Select **OK**
- **On the Area Code tab:** Select **New** or **Edit**

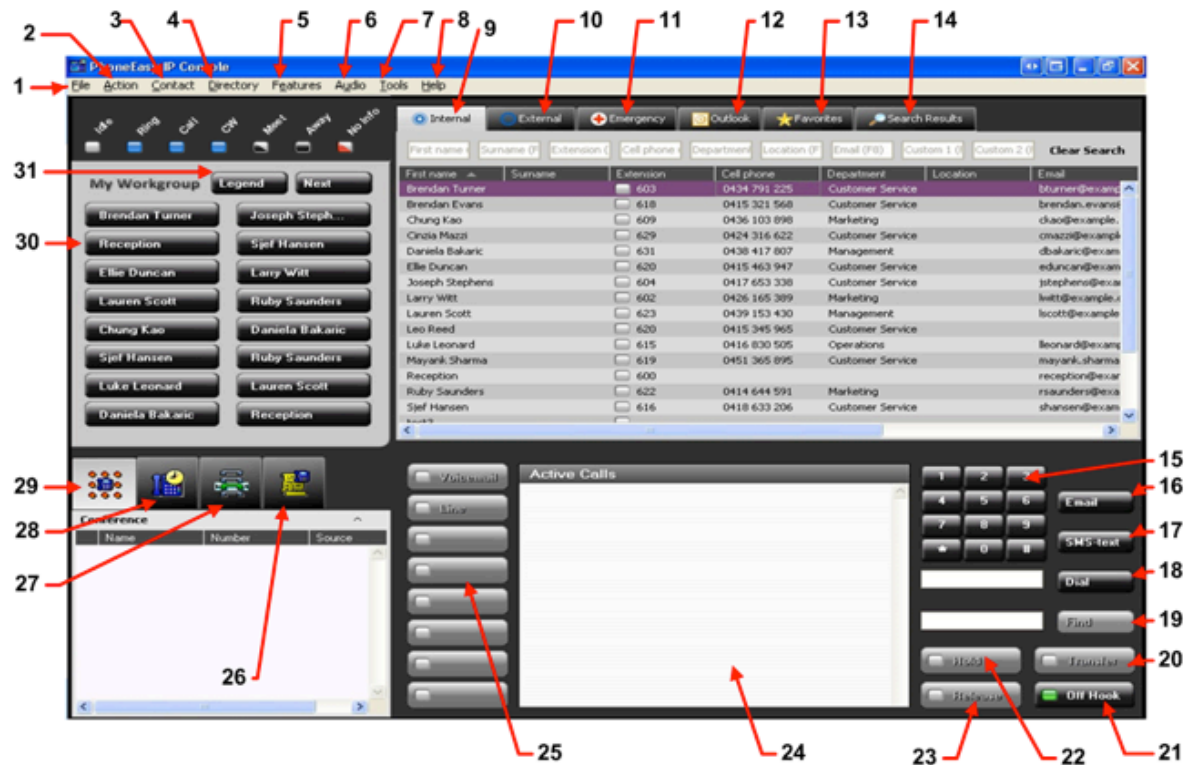

The 'Edit Location' dialog box is shown with the 'Area Code Rules' tab selected. The text reads: 'An area code rule determines how phone numbers are dialed from your current area code to other area codes and within your area code.' Below this is a table with the following content:

Area Code	Prefixes	Rule
610	All	Dial 1

Buttons for 'New...', 'Edit...', and 'Delete' are visible below the table. The 'Description' section at the bottom contains the text: 'Select a rule in the list above to view its description, or click New to add a rule.' Buttons for 'OK', 'Cancel', and 'Apply' are at the bottom of the dialog.

- Create the Rule to Dial 1 and select **OK**

1	FILE: Set Password, Export/Import Contacts, Export/Import Logs, Exit	11	EMERGENCY: View & Search Emergency directory	21	OFF HOOK/ANSWER: Like the operation key

Clicking in the Active Call Area free space will hold a connected call and provide dial-tone for making an outbound call

Divert Alerting Calls

Dragging to a My Workgroup

Divert to a My Workgroup destination station by dragging the alerting call from the Active Call Area and dropping it on a My Workgroup key

Dragging to a Directory Entry

Divert to a directory entry's primary number by dragging the alerting call from the Active Call Area and dropping it on a directory entry

Perform a Blind Transfer

Dragging to a My Workgroup

Blind transfer to a My Workgroup destination station by dragging the connected call from the Active Call Area and dropping it on a My Workgroup key

Dragging to a Directory Entry

Blind transfer to a directory entry's primary number by dragging the connected call from the Active Call Area and dropping it on a directory entry

Perform a Consultative Transfer

Using the Off Hook/Answer (Operation) Key

Commence a consultative transfer by pressing the Off Hook/Answer (Operation) key. The call is placed On Hold Pending Transfer and dial-tone is provided for the consultation call

Make the consultation call. Press Transfer to Complete the Transfer of the call to the transferee. Press Release to cancel and abandon the consultation call

Dragging a My Workgroup Entry to the connected call

Commence a consultative transfer by dragging a My Workgroup entry to the connected call. The call is placed On Hold Pending Transfer and the destination station for the My Workgroup entry is dialed for the consultation call.

Press Transfer to Complete the Transfer of the call to the transferee. Press Release to cancel and abandon the consultation call

Dragging a directory entry to the connected call

Commence a consultative transfer by dragging a directory entry to the connected call. The call is placed On Hold Pending Transfer and the primary number for the entry is dialed for the consultation call

Press Transfer to Complete the Transfer of the call to the transferee. Press Release to cancel and abandon the consultation call

Dragging a Call Log entry to the connected call

Commence a consultative transfer by dragging a call log entry to the connected call. The call is placed On Hold Pending Transfer and the primary number for the entry is dialed for the consultation call.

Press Transfer to Complete the Transfer of the call to the transferee. Press Release to cancel and abandon the consultation call

Call Scheduling

Commence a Scheduling by dragging My Workgroup or directory entries into the Scheduler Display.

Fill up the Call Scheduling window which pops up for call details and click ok.

When the scheduled time arrives a Scheduled Call Due window pops up. This window presents a choice of Dial to make the call, Snooze to defer for a user specified period, and Dismiss to remove the call from the Scheduler.

Call Stacking

Commence Stacking calls by dragging My Workgroup or directory entries into the Call Stack Display for making outbound calls.

Start or stop the stack through the right mouse menu, and calls can be skipped also from the right mouse menu.

The Call Stack inter-call delay is configurable at Tools—Options—Call Settings. The default delay value is seven seconds.

Conference (4 way Conference including yourself)

Commence a Conference by making calls to the required parties. (These could be a mixture of both Inbound or Outbound calls)

Right click on any call in the Active Call Area and select Conference to start the conference OR click on the Conference Flexkey to start the conference

To add a new party to the conference, Right click on the call in the Active Call Area and select Conference OR Right click on the conference call in the Active Call Area and select Conference OR click on the Conference Flexkey

You are NOT able to explicitly specify the party that you wish to conference

Email

Right Click a contact in My Workgroup or Directory to Email
